DETAILED ACTION

Election/Restrictions

Claims 9-11,4 and 6 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 3.

Double Patenting

Claims 1-14 directed to the same invention as that of claims 8-10 of commonly assigned application no. 09/757541. The issue of priority under 35 U.S.C. 102(g) and possibly 35 U.S.C. 102(f) of this single invention must be resolved.

Since the U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302), the assignee is required to state which entity is the prior inventor of the conflicting subject matter. A terminal disclaimer has no effect in this situation since the basis for refusing more than one patent is priority of invention under 35 U.S.C. 102(f) or (g) and not an extension of monopoly.

Failure to comply with this requirement will result in a holding of abandonment of this application.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 09/756,821

Art Unit: 3726

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,5, and 7-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Applicants Admitted Prior Art. AAPA in the background of the invention discusses all of the steps as claimed as being old.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicants Admitted Prior Art (hereinafter referred to as AAPA) in view of Breault et al..

AAPA teaches a method of making a heat pipe as claimed but lacking a step of molding the conductive material around the pipe after the pipe is filled with working fluid. Breault et al teaches filling the tube after molding. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the method as taught by AAPA by filling the tube after the molding since to do so is taught by Breault et al for the purpose of avoiding cracking and failure of the tube.

Information Disclosure Statement

Applicant is required to submit any pertinent prior art of which he is aware.

Claim Rejections - 35 USC § 112

Application/Control Number: 09/756,821 Page 4

Art Unit: 3726

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5 "insert" should be changed to -inserting--. Correction is required.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
